

UZAIR BIN AHMAD

Frontend Developer | Software Engineering Student

Lahore, Pakistan | ua740738@gmail.com

PROFILE

Sixth-semester BS Software Engineering student with hands-on frontend development experience through self-directed learning and project-based practice. Strong foundation in HTML, CSS, JavaScript, React, C++, data structures, algorithms, SQL, and Python, with basic understanding of Django. Currently studying Machine Learning, Natural Language Processing, and Information Retrieval, and interested in building practical, responsive web applications.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React

Programming: C++, Python, JavaScript

Backend & Database: Django (basic understanding), SQL, Database fundamentals

Core CS: OOP, Data Structures & Algorithms, Analysis of Algorithms, Programming Fundamentals

SELECTED PROJECTS

Foody Zone | React

- Built a React-based food-themed interface using reusable components and a clean, user-focused page structure.

Dice Game | React

- Created an interactive dice game to practice React components, state handling, events, and dynamic UI updates.

Brand Page & Contact Us | React

- Developed responsive React pages while practicing component-based design, layout structure, and reusable UI patterns.

Dino Game & Snake Game | HTML, CSS, JavaScript

- Built browser-based games to strengthen JavaScript logic, DOM interaction, keyboard events, and game-flow fundamentals.

Spotify UI & Weather Project | HTML, CSS, JavaScript

- Created web interfaces to improve responsive styling, JavaScript interaction, and practical frontend development skills.

EDUCATION

Bachelor of Science in Software Engineering | 6th Semester

University of Management and Technology (UMT), Lahore

Technical Electives: Machine Learning, Natural Language Processing, Information Retrieval

Relevant Coursework: Programming Fundamentals, Object-Oriented Programming, Data Structures & Algorithms, Analysis of Algorithms, Database Systems, SQL

LEARNING & STRENGTHS

- Self-directed learner with practical project experience in frontend development using YouTube and hands-on coding practice.
- Comfortable translating basic requirements into responsive web pages and interactive React components.
- Strong academic programming foundation in C++ with growing interest in AI, ML, NLP, and full-stack development.

Open to Software Engineering / Frontend Development internships and junior opportunities
